1. Meeting on Viability Report

The council started with the infrastructure spread sheets. The CAO explained the new additions where in a blue color and added to the bottom of the sheets. The CAO had explained all the changes that where on the spread sheets. The Viability report was read, all questions were answered. It was explained that the capital budget and operating budget coming up for completion on December 17th, 2022, will make changes to the 10-year plan as the need for items come into play. With inflation climbing there will be a higher cost that will affect how many projects can get done and time of completion.
